Synthesizer-legend Francis Rimberty returns with a new album!

Although having worked with partner-in-crime Jean Michel Jarre since 1986, Francis managed to build reputation with his solo career since early seventies, introducing the concept of one-man-orchestra, with his Bionic Orchestra, surrounded with huge amounts of synthesizers. After having done demonstrations for Roland Music and Ensoniq for several years, and having written uncountable music for television and several other occasions, Francis finally decided to concentrate on his own career more and more after having released his 2005 album "Double Face". A year later Francis released the limited EP "Mecanique Du Temps", which also contains an energetic track with guitar virtuoso Patrick Rondat. Then series of concerts and showcases followed (of which his recently given outdoor-concert in Croissy-Sur-Seine will be released on dvd later this year), with guest musicians like Silvain Durand, Patrick Rondat, Angy Todaro and Lol. The re-release of a selection of vintage works from the seventies and eighties took place with "Sound Of Vintage".
